

# JEFFREY GRANGER – New Mexico Weatherization Instructor

Jeffrey was an energy auditor in the nation's first state-wide energy conservation program called ConnSave. Similar to the current WAP program, ConnSave provided energy audits and bonded contractors to implement work orders.

Jeffrey has taught Crew Leader, Energy Auditor, and Installer training classes for the New Mexico Energy Smart Academy (NMESA). In addition to his work at NMESA, he has been a project manager at New Mexico electric and gas utilities and an instructor in the Photovoltaic Training Academy at the Central New Mexico (CNM) Workforce Training Center.
